

This is a call for you to reject NAB Petition 04-160. As an XM Radio subscriber, I pay for the services I get and find them invaluable. I get nothing from radio that is even close, and would hate to see XM Radio regulated from providing traffic and weather information that is of great value to me. I'm a frequent traveller who has benefitted tremendously from having Sat Radio in my vehicle. Since we pay for the service, please allow them to continue to improve their product, unfettered by unneeded regulation. Let the market drive what they should and should not broadcast. Thanks, Rick
